

2017 ASRTU International Conference on Intelligent Manufacturing

2017 阿斯图中俄智能制造国际会议

15th-18th June 2017, Harbin, China

Call for Papers

Sponsors and Organizers

Association of Sino-Russian Technical Universities
Harbin Institute of Technology, Harbin, China
Bauman Moscow State Technical Univ., Moscow, Russia

Chairman:

.....

Co-Chairman:

Hong Liu, Harbin Institute of Technology, China

.....

Scientific committee:

Hegao Cai, Harbin Institute of Technology, China
Dongming Guo, Dalian University of Technology
Han Ding, Huazhong Univ. of Science and Technology
Zongquan Deng, Harbin Institute of Technology, China
Hong Liu, Harbin Institute of Technology, China

.....

Organizing committee:

Jianzheng Gu
Director of Chinese secretariat of ASRTU,
Dean of International Education school of HIT

Haibo Gao
Vice Dean of School of mechanical engineering of HIT

Yongda Yan
Vice Dean of School of mechanical engineering of HIT

Zhijiang Du
Dean Assistant of School of mechanical engineering of HIT

Wenzhang Mei
Chinese connector of ASRTU,
Director of office of Russian Affairs of HIT

Korschunoff Sergei
Russian chief executive of ASRTU,
Vice president of BMSTU

Timofeyev Victor
Russian connector of ASRTU, Director of scientific
research and development office of BMSTU

Contact:

Mei Wenzhang, Du zhijiang
Harbin Institute of Technology
Harbin, West Dazhi Str. 92, 150001, China
Phone: +86-451-86412970
Fax: +86-451-86403916
E-mail: asrtu_conference@163.com, asrtu@hit.edu.cn

INTRODUCTION: ASRTU as a premier association between universities in China and Russian, have a great responsibility to promote cooperation within the framework of the alliance. According to alliance work plan 2017, "2017 ASRTU International Conference on Intelligent Manufacturing" is being organized from Jun 15th to Jun 18th 2017 in Harbin, China, intends to promote the academic exchange and technical cooperation between Russian and China, in the field of intelligent manufacturing.

OBJECTIVE: At present, with booming new technologies in manufacturing, far-reaching changes in the manufacturing industry are taking place. The emergence and development of the industrial accelerate the transformation of global industrial reconstruction and intelligence, and greatly stimulate productivity. Faced with challenges brought by the new round of technological and industrial revolution, "ASRTU-ICIM 2017" is conducted to provide an excellent forum for scientists, researchers, engineers and industrial practitioners to present and discuss the latest technology advancement as well as future directions and trends in Intelligent Manufacturing.

SCOPE: Authors are invited to submit full papers describing original research work, all the papers should be written in English.

All works are in areas including, but not limited to:

- Robotics
- Robotics and Manufacturing technology
- Robotic System Integration
- Collaborative Robotics in Smart Manufacturing;
- Robotics and Computer Integrated Manufacturing;
- Artificial Intelligence in Manufacturing;
- AI Algorithms
- Manufacturing Control and Automation Engineering
- Manufacturing Process and Technology;
- Manufacturing Ergonomics and Human Factors;
- Engineering Design Methods and Tools for Industry 4.0;
- Big Data Analytics in Manufacturing and Services;
- Smart Factories and Industrial Internet of Things;
- Modelling and Simulation;
- Predictive Maintenance and Manufacturing Systems Reliability
- CAD/CAE/CAM/PLM/CIM/DFX/MES;
- Sustainable Manufacturing Engineering and Resource-Efficient Production;
- Process Automation
- Adaptive Control
- Industrial Process Control
- Hydraulic and Pneumatic Transmission
- Mechatronics

IMPORTANT DATES

April 30, 2017: Abstract Submission
May 10, 2017: Notification of accepted
May 30, 2017: Confirmation of Registration
Jun 15, 2017: Registration in Harbin
Jun 15 to 18, 2017: Forum in Harbin
